

PENTAX Medical
The EPK-i5000 video processor.

Operate i-scan quickly and comfortably.

The PENTAX Medical EPK-i5000 combines excellent illumination and HD+ image quality at an outstanding price-performance ratio. Ideal for practitioners who require routine functions offered by state-of-the-art imaging technology in their day-to-day clinical work.

The HD+ video processor that takes your needs into account.

The PENTAX Medical EPK-i5000 video processor is the ideal device for practitioners who require routine functions offered by state-of-the-art imaging technology in their day-to-day clinical work. It combines excellent illumination and unique HD+ image quality at an outstanding price-performance ratio and features the innovative i-scan image-processing technology, providing brilliant precision when assessing surface structures.

Visibility

- Excellent white light illumination supports fast orientation and detection of minute lesions.

Image quality

- HD+ images define the new standard in video endoscopy for an advanced examination.

Preset i-scan

- Preset i-scan Surface Enhancement (SE) and Tone Enhancement (TE) profiles can be selected at the touch of a button.
